- Tools: Git - Docker - Kubernetes
- Concepts: REST - JWT - OOP

PROFILE

Computer Science and Engineering student with hands-on experience through software engineering internships in remote and onsite environments. Experienced in collaborative development, modern technologies, and Agile practices. Seeking opportunities to grow as a Software Engineer.

EXPERIENCE

- **Endava - Software Engineering Intern** 2 MONTHS
On-site
 - Developed an internal application for tracking employee activities and learning progress.
 - Developed features using .NET 10, React, MSSQL, Tailwind CSS.
 - Worked in an Agile/Scrum environment with GitFlow and presented the application to company stakeholders.
- **Motion Source LLC - Web Developer Intern** 1 MONTH
Remote
 - Collaborated with interns and developers in a remote, English-speaking team.
 - Developed features using Next.js, React, Keystone.js, and GraphQL.
 - Used Cursor and AI-assisted development, improving prompting, context management, and workflow.
- **Computer Repair & Sales** 2022 - PRESENT
Freelance
 - Repaired and upgraded computers, developing strong PC hardware and troubleshooting skills.
 - Advised customers on technical solutions and computer components based on their needs and budget.

PROJECTS

- Online Learning Platform - Spring Boot · React · PostgreSQL
- Phone Aggregator - Spring Boot · React · Tailwind · Web Scraping
- BookShelf - Spring Boot · Docker · Kubernetes · GitHub Actions
- Personal Portfolio - Figma · Webflow
